

ez DRIVE THRUSTER®

LEADING THE CONTROL REVOLUTION FOR
WAKE SPORT BOATS

THE **YACHT** GROUP
featuring **YACHT CONTROLLER**

THE HISTORY of *ez* DRIVE.

Designed specifically for active watersports boats, wakeboard boats, and other smaller versatile watercrafts.

In the spring of 2016, we identified the need for a thruster which could serve the growing wake sport boat enthusiast making it easier and safer for control of their boats. Our corporate mission is and always has been to make the boating experience better. With that in mind we embarked on developing a new thruster specifically to serve that market's unique requirements. It had to be compact enough to fit below a water sports platform, powerful enough to work effectively with a ballasted wakeboard boat, full passenger compliment, and gear aboard. It also had to be energy efficient enough to operate without a separate battery in spite of heavy use with a long run time of almost 10 minutes. Additionally, since wake sport boats are almost entirely powered with gas engines, the system had to be ignition protected and fitted with waterproof connections throughout for safety and reliability.

The standard control, a small but strong military grade illuminated rocker switch, was developed to both look good and provide visual feedback to the driver. A throttle control upgrade is also available for select applications which allows you to control the thruster from an integrated button on the throttle itself.

EZ to mount, EZ to use, saves up to 30% more fuel, and increases safety. Now enjoyed by thousands of enthusiasts since it's launch in late 2019. EZ drive has created a revolution in wakesurf control.

**The original external thruster for
wakeboard boats!**

+ Increase Swimmer Safety

+ *ez* To Install on Every Brand of Wake Sport Boat

+ Save 30% more fuel with maneuverability efficiency

Additional Features

- ✓ *Instant U-Turns* to pick up downed riders
- ✓ Easy docking capability
- ✓ Simplified trailer loading
- ✓ 3D Mockup for accurate positioning
- ✓ All installation hardware included
- ✓ No additional battery required
- ✓ Complete sealed motor system
- ✓ Ignition protected for safe operation
- ✓ 10 Minutes Continuous Run-Time
- ✓ Push to trip custom breaker
- ✓ Illuminated rocker switch
- ✓ Touch button thruster control on throttle
- ✓ Integrated Hi-Power LED Version
- ✓ ABYC Compliant

e2 To Install on Every Brand of Wake Surf Boat! With Our Custom Engineered Installation Kits

Now offered as optional (OEM) equipment on 7+ major brands and counting!

ezTo Control Advanced Technology!

Developed by "The Most Trusted Technology For The Marine Industry."

SIDE MOUNT THROTTLE CONTROL

Uniquely designed specifically to retro-fit your boat on a plug and play basis. The lift to shift design make shifting safe, smooth, and effortless. The design of the control comes with an ergonomic nob and thruster switch.

ILLUMINATED ROCKER SWITCH

Intuitive "Rocker Switch" design, with illuminated Halo Light and Directional arrows, allows for precision control of your ezDrive thruster by simply rocking the switch back and forth (Port to Starboard) with your fingertips.

Control Your Water Flow For Precision Performance.

AVAILABLE IN MIRROR POLISHED STAINLESS STEEL OR POWDER COATED BLACK ALUMINUM

ez DRIVE

Push-To-Trip Breaker

Developed by EZ Drive to keep electrical components running safe and maintain complete power control.

Technical Specifications

It's 16" x 6" compact dimensions make it "ez" to mount vertically or horizontally even on the shallowest of transoms for excellent performance, and its exceptional power can easily turn a heavy or ballasted boat with 16 passengers on board. The ezDrive system is also ABYC Compliant, ignition protected for safety and has a patented system to prevent runaway thrusters.
