THE ULTIMATE YACHT  CONTROLLER®

A Leap Ahead in Advanced Technology

Our newest members of the Yacht Controller family have evolved 25 years after Yacht Controller originated the concept of Wireless Control of Boats.

Maximo and Supremo (for Super/Mega Yachts) systems employ advanced technology by communicating over Wi-Fi from any smart device to set or modify parameters to its receiver for incremental or proportional speed control. In turn, Maximo communicates to its unique Yacht Controller transmitter via its proven dual band system (rapidly and instantly scrolling more than 100 + channels on each band), thus providing unmatched security and redundancy.

Maximo and Supremo - The ultimate fusion of Wi-Fi and RF bringing unmatched perfection to the world of wireless control of yachts.

Advanced Technical Features:

- 64 Bit Quad-Core Processor CPU scrolling 100+ channels for total security and redundancy
- Proportional & Incremental Speed Control of Engines & Thrusters set or modified via smart phone
- Personalize up to 5 Speed Control profile settings for Engines & Thrusters via smart phone
- Remote firmware updates, radio frequency bandwidth spectrum analyzation and more via Wi-Fi
- Multi-functional capability for dual anchors, swim platforms, cablemasters, etc.
- Three-way communication between Smart Device, Receiver, and Remote
- Access and Control your Maximo or Supremo from anywhere in the world
- Mirror image and control your Maximo on any smart device or navigational screen

See www.YachtController.com For More Information

SMARTPHONE & TABLET CONNECTIVITY

WI-FI ALLOWS CHANGING OF ENGINES AND THRUSTER
POWER PARAMETERS, TUNING, AND DIAGNOSTICS
FROM ANYWHERE IN THE WORLD

64 BIT QUAD-CORE RECEIVER WITH TOUCH SCREEN CAN BE MIRRORED ON
GARMIN AND OTHER CHARTPLOTTERS, MFD, IPADS, AND VARIOUS SMART DEVICES

MAXIMO™

THE ULTIMATE YACHT  CONTROLLER®

REMOTE TRANSCIVER SECURELY AND PRECISELY
CONTROLS BOAT MOVEMENT VIA DUAL BAND
FREQUENCY SCROLLING THROUGH CHANNELS
FOR 100+ TIMES GREATER SECURITY THAN ANY
WIRELESS DOCKING CONTROL AVAILABLE

Platinum Series for Super & Mega Yachts

Everything in MAXIMO & SUPREMO + Transceiver Antenna with Can-Bus Data Cable Communication for Super and Mega Yachts

- Open air communication ranges exceeding 200 meters
- Digital Serial Connection allows for long-run Can-Bus cable extension to remotely mount the antenna system without reducing signal. Others use a simple coaxial cable, which in-turn, reduces signal in relation to the length of the cable.
- Greatly increased computer and communication power with significant channel expansion offering even greater redundancy than the standard Maximo series.

The SUPREMO Platinum's antenna is a CPU powered transceiver with CAN-BUS data cable communication for faster command response and increased range!
