AUTO MODE

- **True X, Y, Z axis joystick control of the outboard motors**
- **Optional control of a bow and/or stern thruster**
- **Adjustable speed settings as found on your helm joystick control**

Configure ezDrive®.ai with your helm joystick and thruster setup for direct smartphone control. True three-axis joystick input gives you precise command over your outboard motors — exactly as you'd expect from your helm, now in the palm of your hand.

AI MODE

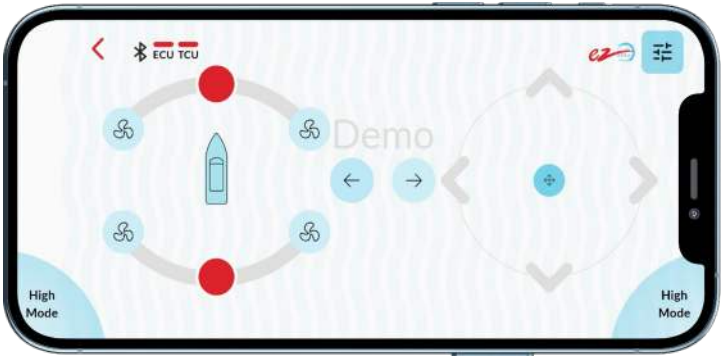
- **True X, Y, Z axis joystick control of the outboard motors**
- **Optional control of a bow and/or stern thruster**
- **Adjustable speed settings as found on your helm joystick control**
- **Single point omnidirectional joystick control**
- **Directional arrow guides for visual feedback**
- **Additional automated functionality**

AI Mode brings the same outboard motor control of Auto Mode and adds intelligent automation on top. A single omnidirectional control point coordinates your drives and thrusters automatically — with visual directional guides to keep you oriented at every step.

CONSOLE CONTROLLER

- **Full landscape orientation for maximum control area**
- **D-pad joystick with 8-directional precision control**
- **Throttle arc display alongside joystick simultaneously**

Rotate your phone to unlock a full-width command layout built for outboard motor setups. The left side displays your throttle arc controls; the right features a precision D-pad with 8-directional control — all the power of Auto Mode in a landscape layout.



CONSOLE CONTROLLER

EFFORTLESS MANEUVERING

Navigate any marina with confidence. ezDrive.ai gives you precise control over every movement, making tight spaces feel spacious.

SMARTPHONE CONTROL

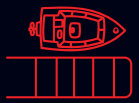
Your phone becomes your command center. Intuitive joystick interface puts engine and thruster control literally in the palm of your hand.

PLUG & PLAY SETUP

Compatible with major propulsion systems. Installation is quick and effortless — no technical expertise required.

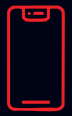
PRECISION HANDLING

Inboard/outboard engines and bow or stern thrusters integrate seamlessly for perfectly matched handling, whether in calm waters or challenging conditions.



DOCKING CONFIDENCE

Your phone becomes your command center. Intuitive joystick interface puts engine and thruster control literally in the palm of your hand.



REAL-TIME RESPONSE

Instantaneous engine and thruster response through the app. Precise, intuitive, and in real-time — exactly when you need it.
